2-12

Includes: Mahogany wood finish hopper, Metal cage, 12 double-sided cards, 300 marker chips, 90 balls, Mahogany finish called-ball tray and Instructions.

How to play:

The Game of Chance

Bingo is a game where numbers are chosen randomly and players look to match a pattern such as a row, diagonal, column or other, on their cards. The first person to match the pattern calls out "Bingo!" to declare themselves the winner. The player's card is checked to make sure the "Bingo!" has been correctly called. If it is, the player receives a prize. If not, the game continues until a winner is called "Bingo!" and has the correct pattern.

Every Bingo card is uniquely marked with numbers 1-90 and each player can play as many cards as they want. One person is designated the "Caller" who selects a random ball from the cage and calls to the letter and number to all players. Each player searches their card for the number, and if found, the player marks their card. The ball is then placed visibly placed on the master board in order to confirm the winner at the end of the game. The game continues until someone announces "Bingo!" when they have the pattern that was set before the game began.

How to win:

Typical patterns include: one line, diagonal line, cross, outside box, X, etc....

Bingo cards contain five columns and five rows for a total of 25 squares.

The centre square is called the "Free Space" and is automatically counted as a marked square.

The caller first calls the letter, B,I,N,G or O and then the number.

The letter refers to the column in which the number can be found.

COLUMN	NUMBERS
B	1 to 18
I	19 to 36
N	37 to 54
G	55 to 72
O	73 to 90
