

# KIDS CLASSIC GAMES

## INSTRUCTIONS

### Memory Match

**Objective:** Find the matching pairs.

**Includes:** 48 Large playing pieces

#### How to play:

Each set contains 24 matching pairs of cards. To begin, mix all the cards face down.

The youngest player starts by selecting any 2 random cards and flips them over so that all players are able to see the images. If they match, the player keeps the cards and repeats the step. If they do not match, the cards are turned back over and placed into their original resting spots. A player's turn is over if he/she doesn't find a matching pair. The next player takes a turn.

#### To Win:

Once all the cards have been matched and there are no more cards left, the players count the number of cards they were able to keep. The winner of the game is the individual who has earned the most cards!
