# BINGO

## INSTRUCTIONS

**Includes:** 90 Number Chips, 12 Bingo Cards, 150 Coloured Markers and 1 Tumbler.

### Object of the game:

Bingo is a game where numbers are chosen randomly and players look to match the pattern such as a row, diagonal, column or other on their cards.

### How to play:

Every Bingo card is uniquely marked with numbers 1-90 and each player can play multiple cards.

There is 1 person designated the "Caller", who turns the tumbler and calls out the number of the chip that falls out, to all players.

The chip is then placed visibly on the sheet and kept to confirm the winner at the end of the game.

Each player searches their card for the number, and if found, the player marks their card.

The game continues until someone announces Bingo if they have the pattern that was set before the game began.

### How to win:

The first person to match the pattern calls out the word "Bingo!" to declare themselves the winner. The player's card is checked to make sure Bingo has been correctly called. If not, the game continues until a winner calls out "Bingo!" and they have the correct pattern.
